DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 9, 10 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,430,184 to Robins et al.

As concerns claim 1, receiving a message (fig. 6 - 351); performing a hash function on the message to provide a hash result (fig. 6 - 356; col. 8, lines 41-43; col. 18, lines 1-7); performing pattern matching on the message to provide a pattern match result (fig. 6 - 357; col. 8, lines 41-43; col. 18, line 21), wherein the pattern match result indicates whether the received message includes a first predetermined pattern, and wherein when the pattern match result indicates that the received message includes the first predetermined pattern, the pattern match result further indicates whether the message having the first predetermined pattern is one of accepted, rejected and neither accepted nor rejected (fig. 6 - flowchart after 357; col. 18, lines 20-40); and selectively accepting the message based at least on the pattern match result (col. 18, lines 20-40).

As concerns claim 2, wherein receiving the message comprises receiving at least a portion of a packet (col. 8, lines 15-19).

As concerns claim 3, wherein the packet is further characterized as an Ethernet packet (col. 8, line 12).

As concerns claim 4, the message comprises a destination address and wherein performing the hash function on the message comprises performing the hash function on the destination address (col. 10, lines 52-53).

As concerns claim 5, wherein selectively accepting the message is based on the pattern match result and the hash result (col. 18, lines 20-40).

As concerns claim 6, wherein the hash result indicates whether the hash function resulted in a hash hit (col. 18, lines 25-30).

As concerns claim 9, the pattern match result indicates whether the received message includes at least one of the first predetermined pattern and a second predetermined pattern (col. 18, lines 20-40).

As concerns claim 10, the pattern match result further indicates whether the message having the at least one of the first predetermined pattern and the second predetermined pattern is one of accepted, rejected and neither accepted nor rejected (fig. 6 – flowchart after 357; col. 18, lines 20-40).

As concerns claim 20, wherein selectively accepting the message based at least on the pattern match result is performed without processor interruption (col. 3, lines 3-14).

Allowable Subject Matter

3. Claims 24-54 are allowed.
4. Claims 11-19 and 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Walsh whose telephone number is 571-272-7063. The examiner can normally be reached on Monday-Thursday from 7:00-5:30.
